3. Start the game: The game begins with the ball being placed in the center of the table. The player who goes first will use their figures to try and move the ball towards the opposing team's goal.
4. Move the figures: Each player will use the handles on their rods to move the figures on their side of the table. The figures are attached to the rods and can be spun, moved forward and backward, and moved side to side. The objective is to use the figures to move the ball into the opposing team's goal.
5. Score a goal: A goal is scored when the ball crosses the opposing team's goal line. The first team to score five goals wins the game.
